Subject: Upcoming Standard SAP in SRM

Audience: AST Leads, Procurement Directors

There is a new standard SAP functionality which SCEIS will delay implementing due to year-end activity. This new SAP standard means that a Purchase Order cannot be increased if the increase will exceed the original amount that was approved on the Shopping Cart.

SCEIS users have been able to increase the amount of a Purchase Order even if the increase exceeded the amount approved on the Shopping Cart. SAP considered this a defect and added a fix in the March 7 Support Pack.

Due to year-end functions and the impact this change would have on the creation of Blanket Purchase Orders and early Shopping Carts, the SCEIS team is working to determine the best timing to install this change after year-end. More information will be sent in future communications.
