Weekly Update

July 30, 2018
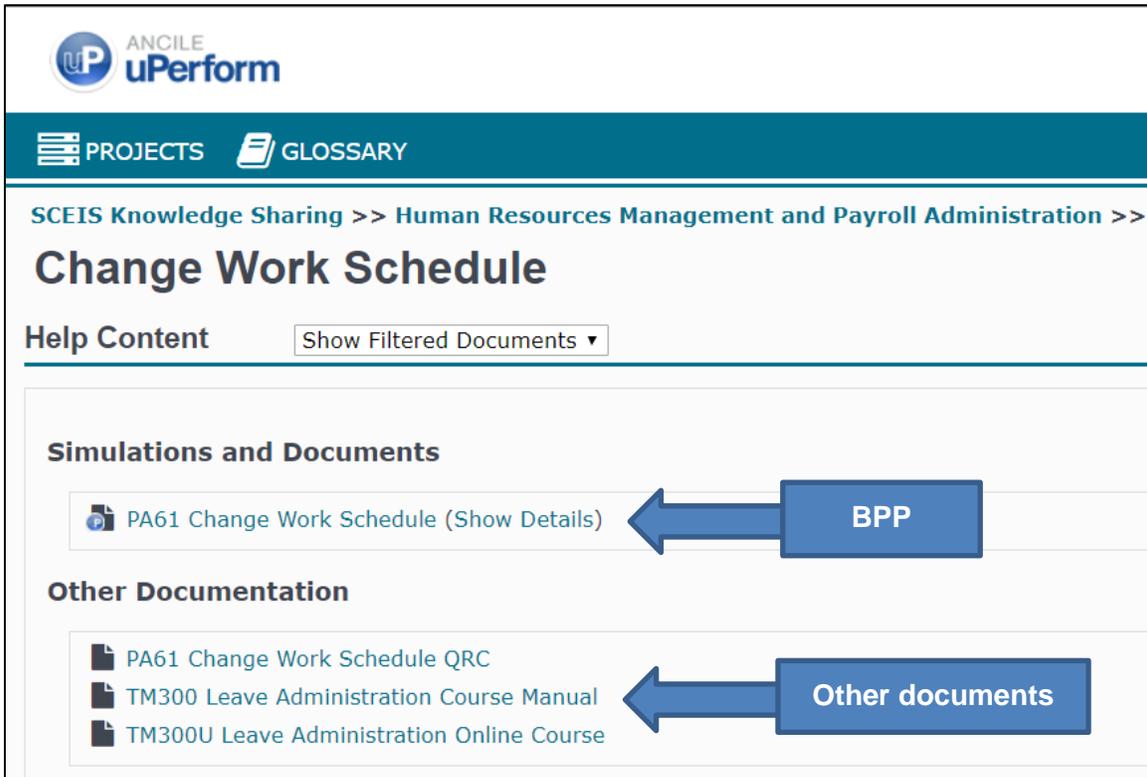

Subject: New Version of uPerform Training Software Available August 1, 2018
Audience: All SCEIS Users

The SCEIS Team is pleased to announce that users will see a new version of SCEIS uPerform beginning August 1, 2018. The uPerform upgrade will improve compatibility with SCEIS systems such as ECC, SRM and SCEIS Central.

The functionality of uPerform will largely remain the same; however, there will be slight visual differences in the new version:

- When viewing documents pertaining to a particular function in SCEIS, users will see the familiar Business Process Procedure (BPP) documents separated from the other training documentation such as Quick Reference Cards and training manuals. BPP documents will be under the Simulations and Documents section, while other training materials will be under the Other Documentation section.
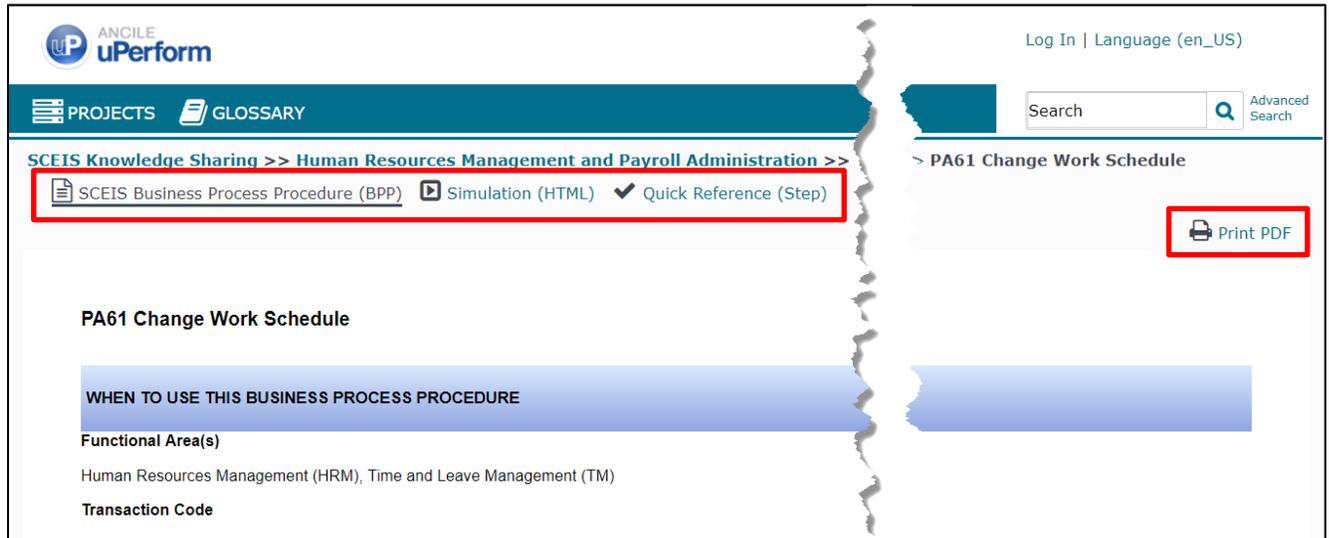

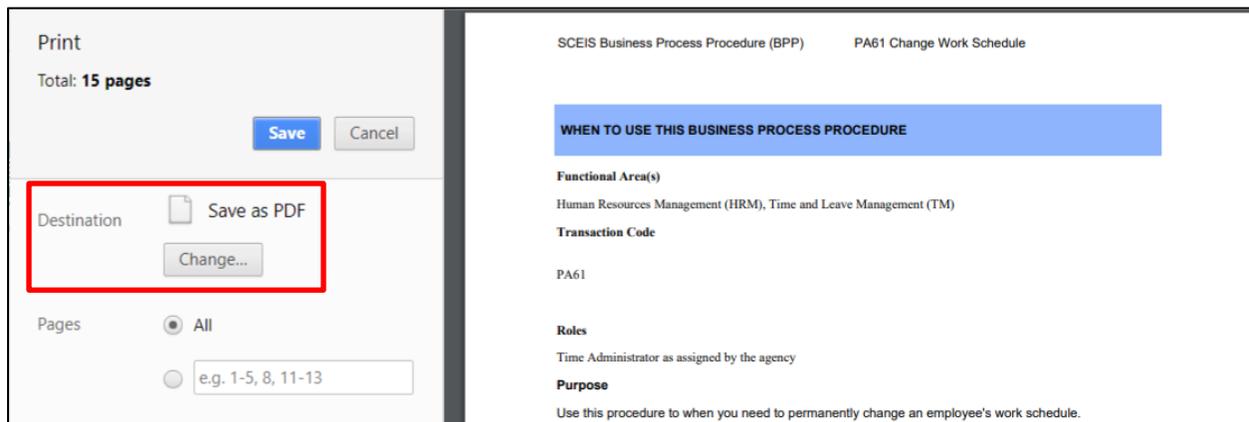

- When viewing a BPP, the format options are no longer in the drop-down menu at the top of the screen. The format options are prominently displayed separately at the top of the screen.

- The Print PDF option will allow you to save the BPP as a PDF by changing the Destination to Save as PDF.
