

## Material Master SRM Guide to Hard Stop and Common Errors

Error or Issue	Resolution
Material is not defined	<p><b>Problem:</b> User is trying to create a requisition, sales order, etc. using a new Material Master but is receiving the error message “Material is not defined.”</p> <p><b>Resolution:</b> The Material Master has not been extended by the AMML. The AMML must complete the creation process for the Material Master by extending it to the Plant and all the views pertinent to the agency before the material can be utilized.</p>
