Error or Issue	Resolution
⚠️ Budget not to be exceeded LVA XXXX	**Problem:** The User is attempting to key-in a dollar value for the Low Value Asset (LVA) that exceeds the Asset Class. LVAs have a maximum dollar value of $4,999.99. This error can be generated in SRM due to a change in the Purchase Order (PO). The error may also occur in ECC due to an invoiced processed by Finance (FI) where the invoice is valid and FI is requesting a PO change. **Solution:** Either the dollar value was keyed in incorrectly, the LVA Asset Class was wrong when the LVA was originally created, or the invoice amount exceeds the LVA Class. Contact the agency Asset Custodian.
