Manager Self Service

Time Facts

Time Approval

The Time Approval application is a little different from others in Manager Self Service. Managers can only view time submissions from their direct reports. Other views in Manager Self Service allow managers to display employees in lower-level org units as well. A higher-level

manager **CANNOT** be defaulted in the system to be the back-up time approver in the event a lower-level manager is absent.

Note: If a manager position is **VACANT**, employees who report to that manager will **NOT** automatically be directed to the higher-level manager for time approval. If an org unit has a vacant manager position, or if a manager is unavailable to approve time submissions in Manager Self Service, time will need to be approved by a recognized approving authority (Time Approver and/or Time Administrator) directly in SAP.

Entering Time for Employees

Managers **CAN** use the system to enter time on behalf of their employees. To do so, go to **My Team** \rightarrow **Employee Information** \rightarrow **General Information**. From the General Information area, the manager selects the **name of the employee** he or she wants to enter time for, then selects **Related Activities**, followed by **Record Working Time**.
