REP210 Reporting with BEx

Description
This instructor-led course teaches you how to use BEx to report data from the SCEIS system. Participants learn where different types of BEx reports are located and how to customize the reports to fit their needs. At the end of class, a representative from the SCEIS Finance, Materials Management, and/or Human Resources and Payroll team will be available to answer any questions related to the specific data in BEx reports.

REP210 focuses solely on BEx. (Users interested in learning BusinessObjects should register for the course REP200 Reporting with BusinessObjects.)

REP210 is tailored for a Finance (FI)/ Materials Management (MM) audience or a Human Resources (HR)/Payroll audience. The class discussions, examples and screenshots are tailored to the audience; however, the steps are the same for all functional areas. You do not need to take the class twice, regardless of the range of your duties.

Target Audience
REP210 is for SCEIS users who need to report data from SCEIS using the reporting tool BEx.
