

How to Edit the Dynamic Section/Content Area “Setting” in SRM 7.2

in

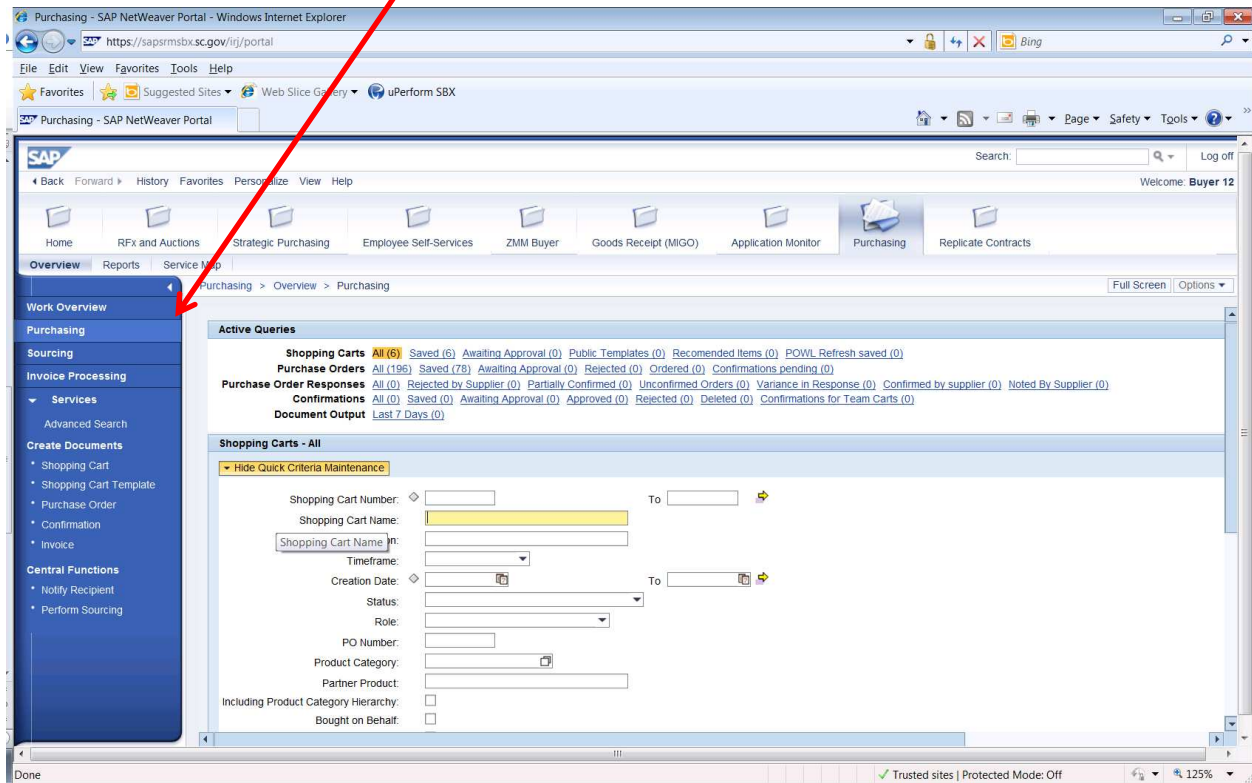

Assign Sources of Supply: Step 1 (Select Requisition)

Purpose: This How-to document is provided to assist you in changing the standard SCEIS “Settings” on the Assign Sources of Supply: Step 1 (Select Requisition), Dynamic Section/Content Area. The path is the standard Purchasing – Purchasing - Perform Sourcing.

Select the folder labeled – Purchasing.

The screenshot displays the SAP NetWeaver Portal interface. The browser address bar shows the URL <https://sapsrmbx.sc.gov/ij/portal>. The navigation pane on the left includes sections for Work Overview, Purchasing, Sourcing, Invoice Processing, Services, Advanced Search, Create Documents, and Central Functions. The 'Purchasing' folder is selected in the navigation pane. The main content area shows 'Active Queries' with counts for Shopping Carts, Purchase Orders, Purchase Order Responses, Confirmations, and Document Output. Below this, the 'Shopping Carts - All' section is highlighted with a red box, containing search criteria fields such as Shopping Cart Number, Name, Description, Timeframe, Creation Date, Status, Role, PO Number, Product Category, Partner Product, Including Product Category Hierarchy, and Bought on Behalf. Two red arrows originate from the text above: one points to the 'Purchasing' folder in the navigation pane, and the other points to the 'Shopping Carts - All' section in the main content area.

Then select the blue menu bar – Purchasing.

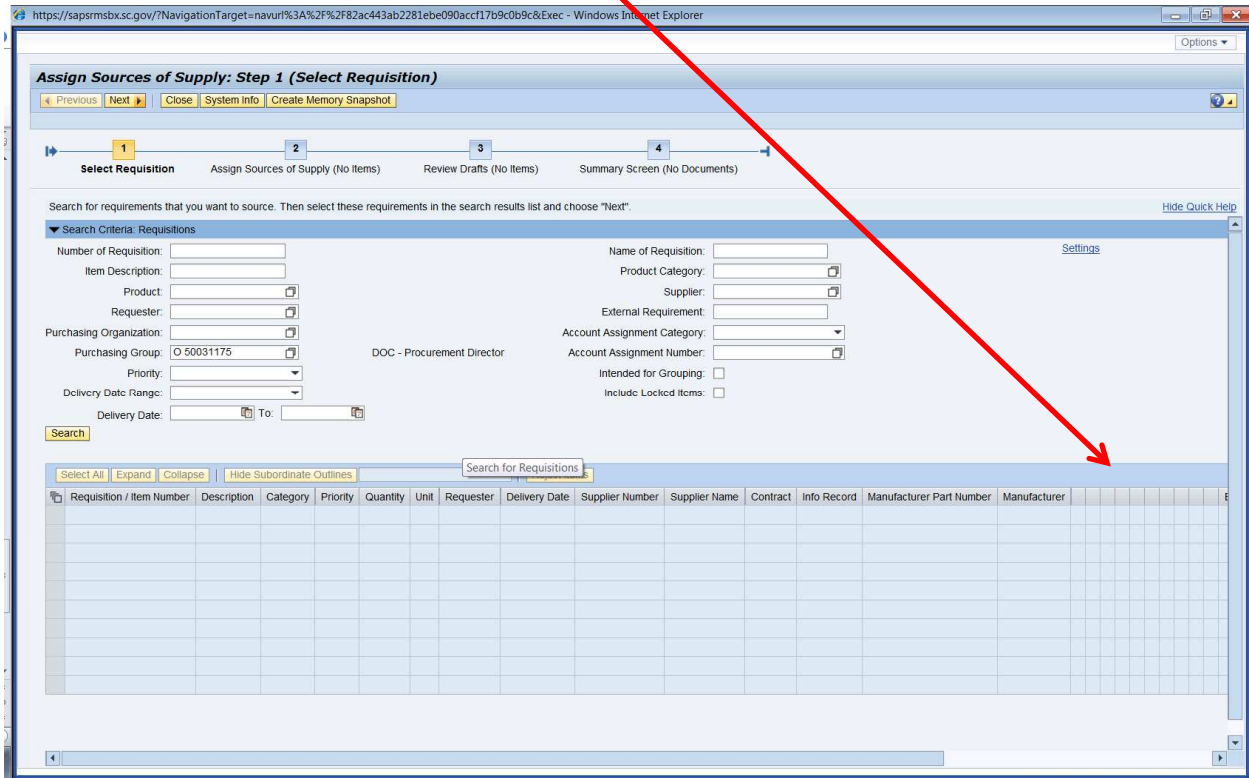

Then select Perform Sourcing and as soon as you select Perform Sourcing another screen pops up in the upper left corner of your screen.

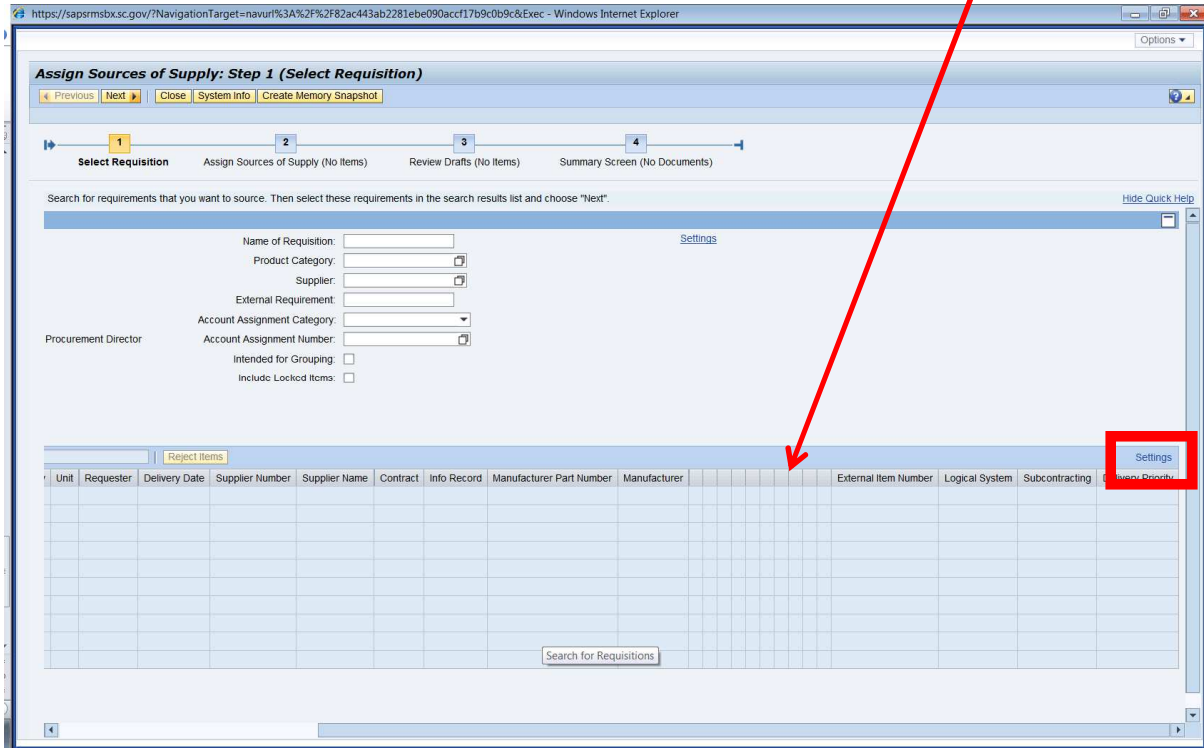

Then select the Maximize button.

After you Maximize the screen, the system presents the following screen: Assign Sources of Supply: Step 1 (Select Requisition). Notice these blank columns. You may need the data that is in the columns to the right of Manufacturer Part Number.

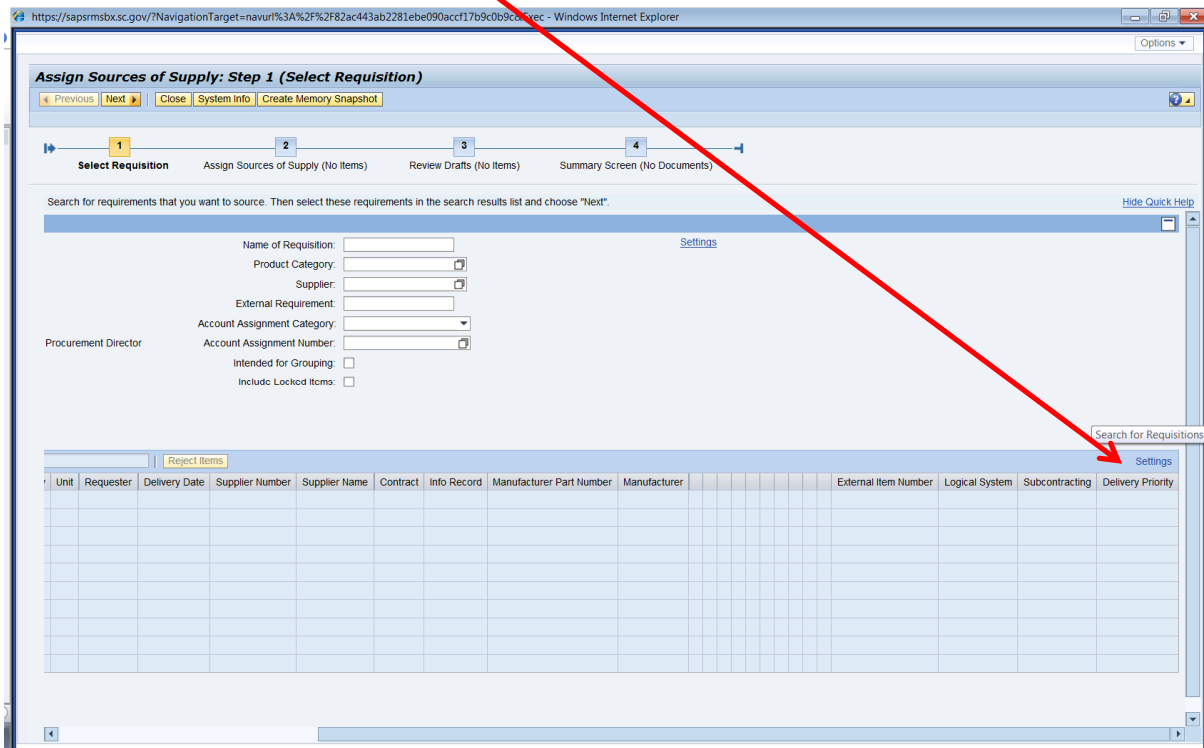

Scroll to the right. If you are a Buyer for an Inventory agency you might want to delete these columns to see the "External item Number" column which will display any Purchase Requisitions created that are associated with the Inventory Shopping Cart you are attempting to source.

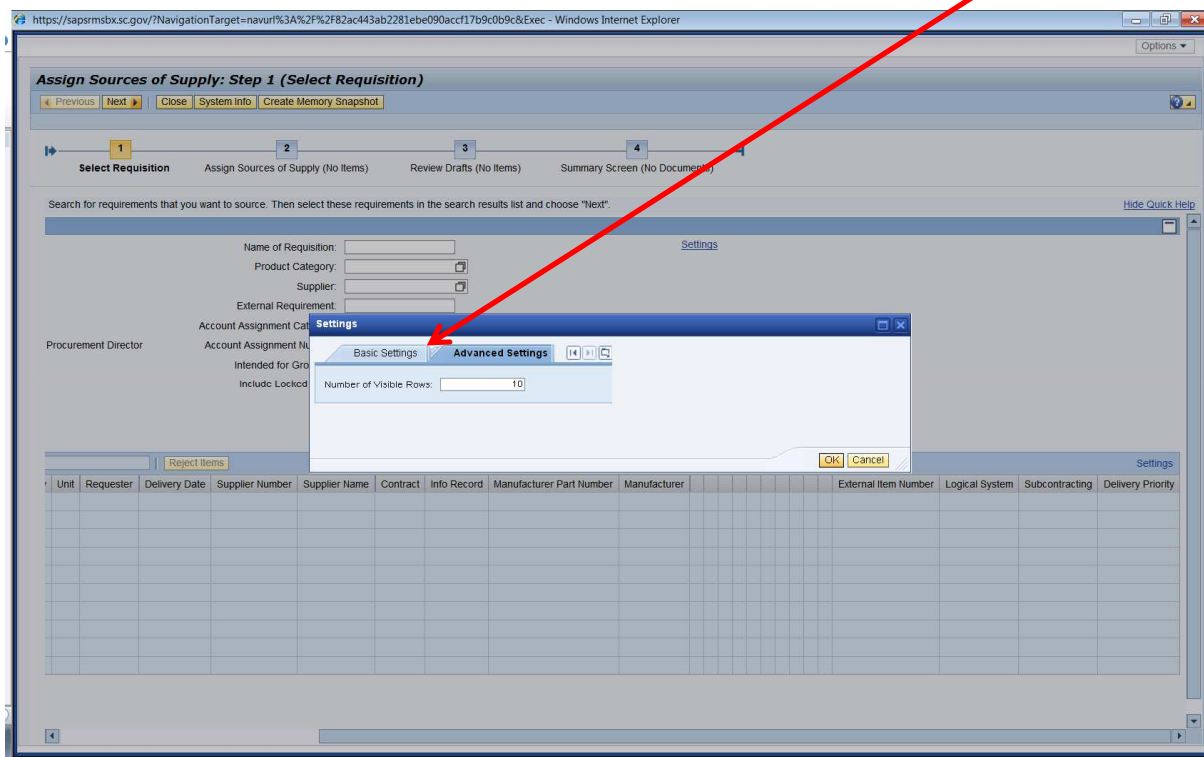

Here is the view with the screen fully scrolled to the right. The following instructions give guidance to edit the Dynamic Section/Content Area "Setting," specifically deleting these blank columns.

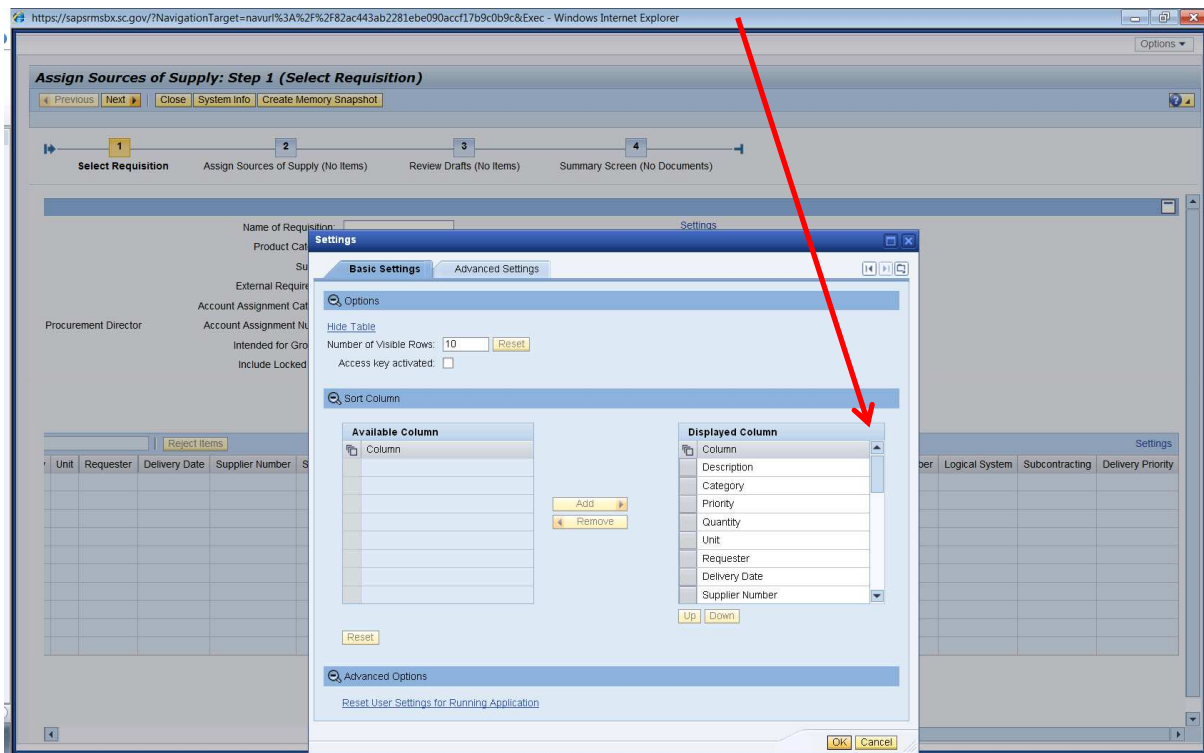

Select the blue hyper link "Settings."

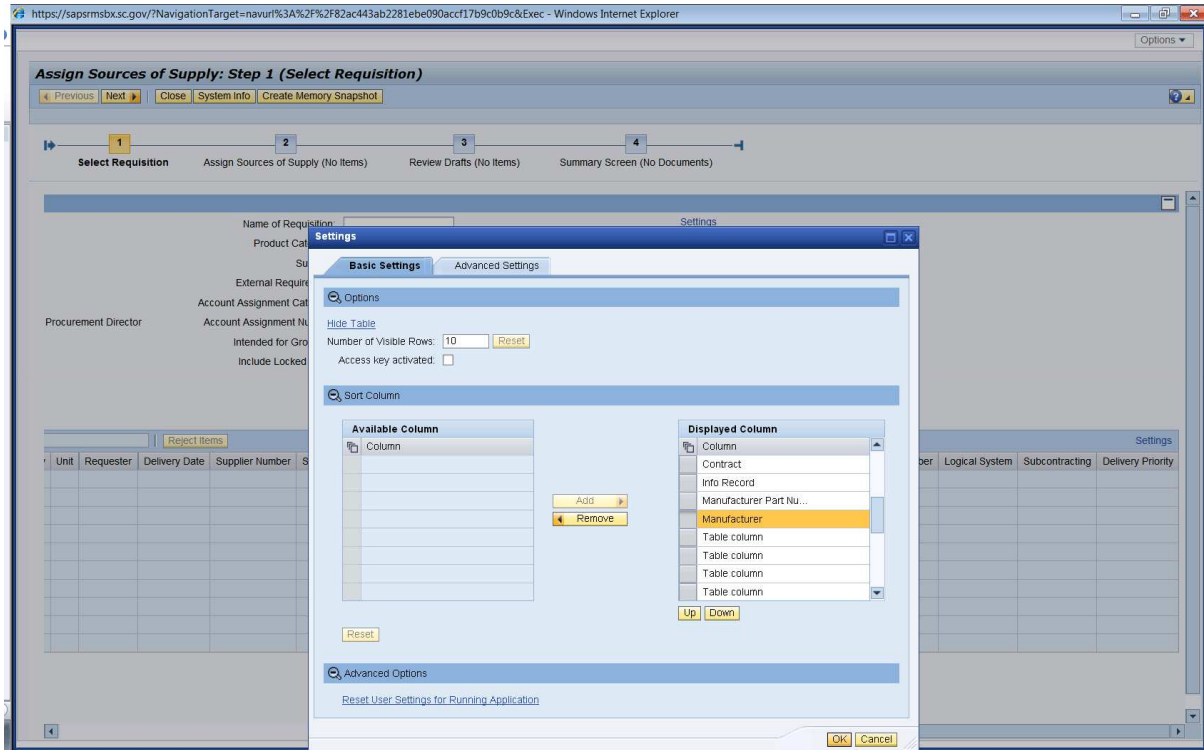

Then the system will present the following screen. Select “Basic Settings” versus “Advanced Settings.”

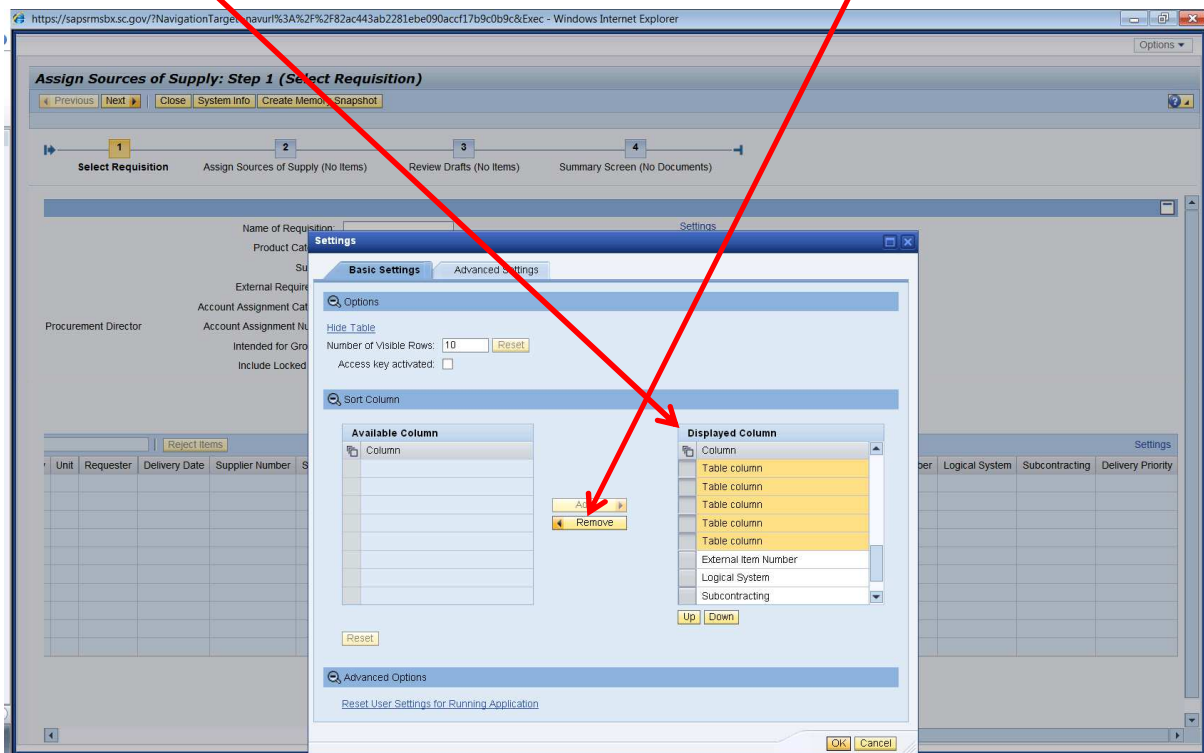

Then the system will present the following screen. Scroll down till you see the Manufacturer column.

After you have scrolled down to the Manufacturer column, then

Highlight the rows you want to remove from the display, then select the "Remove" button, then select the OK button. Give the system a few moments to update the view.

The screen shot below represents the new revised view. Now if you are looking for an Inventory Purchase Requisition you will be able to see it in the “External Item Number” column.

The screenshot shows the SAP 'Assign Sources of Supply: Step 1 (Select Requisition)' interface. At the top, there are navigation buttons: Previous, Next, Close, System Info, and Create Memory Snapshot. Below this is a progress bar with four steps: 1. Select Requisition (active), 2. Assign Sources of Supply (No Items), 3. Review Drafts (No Items), and 4. Summary Screen (No Documents). The main area contains search criteria for Requisitions, including fields for Number of Requisition, Item Description, Product, Requester, Purchasing Organization, Purchasing Group (set to O 50031175), Priority, Delivery Date Range, Name of Requisition, Product Category, Supplier, External Requirement, Account Assignment Category, Account Assignment Number, Intended for Grouping, and Include Locked Items. A 'Search' button is located below the search criteria. Below the search area is a table with columns: Requisition / Item Number, Description, Category, Priority, Quantity, Unit, Requester, Delivery Date, Supplier Number, Supplier Name, Contract, Info Record, Manufacturer Part Number, Manufacturer, External Item Number, and Logical S. A 'Search for Requisitions' button is centered in the table area. A red arrow points from the top right towards the 'External Item Number' column header.
